

Ideation Phase

Brainstorm & Idea Prioritization Template

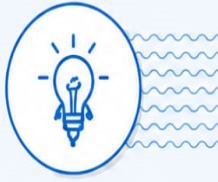

Date	26 June 2026
Project Name	OptiCrop
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization

Brainstorming for the **OptiCrop – Smart Agricultural Production Optimization Engine** enables the team to generate innovative ideas for improving crop recommendations and resource management. It encourages collaboration to explore solutions based on soil nutrients, weather conditions, and crop requirements.

By evaluating and prioritizing the most practical and impactful ideas, the team can develop an efficient, data-driven solution that helps farmers increase crop yield, optimize fertilizer usage, and promote sustainable agriculture.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

🕒 10 minutes to prepare

👤 1 hour to collaborate

👤 2-8 people recommended

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

🕒 10 minutes

Team gathering

Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

Set the goal

Think about the problem you'll be focusing on solving in the brainstorming session.

Learn how to use the facilitation tools

Use the Facilitation Superpowers to run a happy and productive session.

Step-2: Brainstorm, Idea Listing and Grouping

2 Brainstorm

Write down any ideas that come to mind that address your problem statement.

🕒 10 minutes

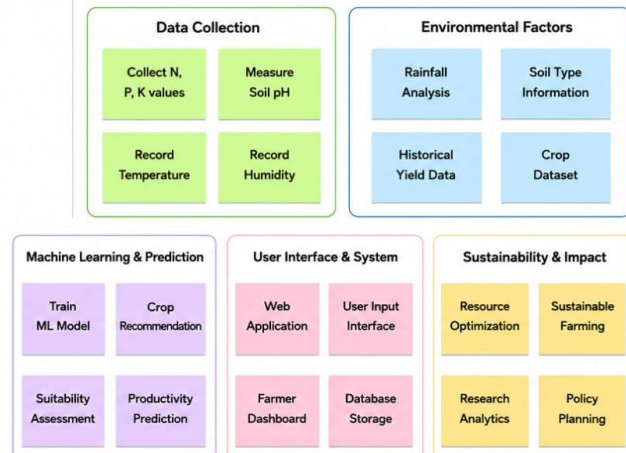

Tip
You can select a sticky note and hit Enter to quickly add a new one underneath!

Collect N, P, K values	Measure Soil pH	Record Temperature	Record Humidity
Rainfall Analysis	Crop Dataset	Historical Yield Data	Soil Type Information
Train ML Model	Crop Recommendation	Suitability Assessment	Productivity Prediction
Resource Optimization	Sustainable Farming	Farmer Dashboard	Database Storage
Web Application	User Input Interface	Research Analytics	Policy Planning

3 Group Ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a super-name (like label). If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

🕒 20 minutes

Step-3: Idea Prioritization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are doable.

🕒 20 minutes

Importance

If each of these ideas could get done, which one would you most want to see have the most positive impact?
